

## Proper Management and Disposal of Wastes

- Recycle when possible.
- Dispose hazardous materials properly.
- Only place the correct trash in dumpsters.

## Management of Waste Materials in Dumpsters

Cover dumpsters and make sure there are no leaks or spills.

Do not throw away hazardous waste.

## Storm Water

### For “Industrial”

## Ice Prevention Materials

Minimize use of salt or de-icing materials and store salt where it will be protected from precipitation.

## Proper Storage of Industrial Materials

Store where spills can be prevented and rain will not disperse the material or become contaminated.

## On-Site Infiltration Benefits

- Runoff receives treatment, to help filter out chemicals, bacteria, and debris, instead of entering surface waters.
- Slows down runoff reducing erosion.
- Helps preserve water quality, aquatic habitat, and organisms.
- Prevents contaminated water from flowing to another watershed area.

---

*“Only Rain Down the Drain... Seriously”*

---

## Management Techniques:

- Direct water to more permeable areas.
- Detain water to allow infiltration.
- Intercept and hold rainwater.
- Keep up with maintenance activities – mowing and inspections after rain events.

## Manage Parking Lot Surfaces

- Sweep parking lot and dispose of debris.
- Plant greenery around parking lot.

## Equipment Inspection and Maintenance

- Determine what equipment will be exposed to storm water or could be a source of discharges.
- Regularly inspect equipment to ensure it is functioning properly.
- Take actions to repair the equipment's damage and clean its surroundings.
